God bless you, friend. I don't know where you get the energy to be so sweet ALL the time!

Angela,

I just wanted to say thank you for coordinating our new "Math Menu." I know it was hard to find any extra time in our busy schedule to correlate the skills in our math book with those in our COS, yet you did, AND THEN wrote the proposal so that we could have a work day to actually develop our plan!

I know we are just all in the implementation stage, but I am already seeing improvement in my students as they gain success in their math groups. They don't even realize that the groups are actually leveled! They are just having fun learning! The games and activities make the centers so easy to plan. I am finally able to address the needs of my low students and give the enrichment that is so needed for my high students, all in a plan that is easy to manage. I can't wait to see their growth as the year progresses. Thank you again for your commitment to our team and the education of our little ones!

Jan
